

Grantee: South Carolina

Grant: P-19-SC-45-0DD2

April 1, 2026 thru June 30, 2026 Performance Report

Grant Number: P-19-SC-45-0DD2	Obligation Date:	Award Date:
Grantee Name: South Carolina	Contract End Date:	Review by HUD: Submitted - Await for Review
Grant Award Amount: \$72,075,000.00	Grant Status: Active	QPR Contact: Henry Koch
LOCCS Authorized Amount:	Estimated PI/RL Funds: \$0.00	
Total Budget: \$72,075,000.00		

Disasters:

Declaration Number

FEMA-4394-SC

Narratives

Disaster Damage:

In September 2018, South Carolina was impacted by high winds, tornados, storm surge, and flash flooding from Hurricane Florence as it made landfall near Wrightsville Beach, North Carolina on September 14th, 2018 as a category 1 hurricane. After landfall, Hurricane Florence stalled briefly and began a slow southwestward track over South Carolina as it weakened into a tropical storm, bringing tropical storm force winds and heavy rains to eastern parts of the state. More than 16,837 residents applied for Individual Assistance from FEMA, more than 8,000 residences had a real property FEMA Verified Property Loss as a result of the storm, and more than 4,438 residents received Housing Assistance from FEMA. A preliminary estimate of Hurricane Florence’s financial impact to South Carolina is \$911,226,169 across housing, economic, and infrastructure sectors.

While less than 15% of South Carolina’s population lives within the areas impacted by Florence, the impacted population is significantly more vulnerable to natural disasters compared to the remaining 85% of South Carolina's population. The counties most affected by the storm have higher poverty rates, a higher percentage of residents over 65, a lower percentage of residents with a bachelors degree, a higher percentage of individuals with disabilities, and a higher percentage of individuals without health insurance than the rest of the State. Compared to the State as a whole, there is a higher concentration of individuals with vulnerabilities that impair their speed of recovery. The State will focus its efforts towards the Low to Moderate Income (LMI) and vulnerable communities within the affected counties.

Recovery Needs:

In 2018 and 2020, Congress passed Public Law 115-254 and Public Law 116-20, which awarded the State of South Carolina \$47,775,000.00 for grant number B-19-DV-45-0001 and \$24,300,000.00 for grant B-19-DV-45-0002 for a combined total of \$72,075,000 in Community Development Block Grant – Disaster Recovery funds for Hurricane Florence. The public laws also stipulate that at least \$57,600,000 of the award must go to the Most Impacted and Distressed (MID) areas of Horry County, Marion County, and the Zip Code area of 29536 (Dillon County). As authorized in the Public Law, the State will expand the MID categorization to include the rest of Dillon County. Chesterfield, Darlington, Florence, Georgetown, and Marlboro Counties are included in the grant as Non-Most Impacted and Distressed (NMID) areas.

The State will administer a Single Family Housing Program, a Buyout Program, and a Rental Repair Program. The Single Family Housing Program will assist applicants whose homes were damaged by Hurricane Florence. The State, through its Implementation Contractor, will rehabilitate, reconstruct, or replace the damaged homes. The Rental Repair program will assist owners that rent out currently vacant single-family stick-built properties. Once repaired, these properties will be required to only lease the units to LMI households earning 80% or less of the Area Median Income (AMI) and meet HUD HOME affordable rent limits for 5 years.

The State will also administer a Buyout Program within the MID counties. This program will assist property owners within a FEMA designated 100 year floodplain that suffered damage to their home from Hurricane Florence by offering to purchase their home at pre-disaster fair market value. Following the purchase, the State will demolish the damaged house and emplace a Conservation Covenant on the property, preventing further residential or commercial development of the land. The property will then be transferred to either local governments, non-profit organizations, or other entities. This program seeks to remove disaster-prone homes and structures from the floodplain and to encourage the previous homeowner to relocate to an area of reduced flood risk.

Overall Progress Narrative:

This penultimate Quarterly Progress Report (QPR) is the 21st published for grant number P-19-SC-45-0DD2, which includes both B-19-DV-45-0001 and B-19-DV-45-0002 grants, by the state of South Carolina, home of the Citadel Bulldogs who won the 2026 Southern Conference Baseball Championship. The South Carolina Office of Resilience through the South Carolina Disaster Recovery Division and its procured contractor BDO Government Services, LLC (the State) will discuss its progress between 1 April and 30 June in the QPR below. The State’s efforts reflect a grant it received from the Department of Housing and Urban Development (HUD) to rebuild South Carolina from damage caused by the September 2018 Hurricane Florence (DR-4394).

During this quarter, the State completed its last drawdowns for the grant. These drawdowns were for previously incurred costs, as well as final contract metrics payments to the Implementation Contractor. Additionally, a voucher revision was completed to correctly place costs related to an Urgent Need case within the correct activity. The State is undergoing the new Grant Closeout Process, as prescribed by HUD in early July, and expects to closeout the grant and submit the Final QPR shortly after submitting this QPR.

The State completed the construction phase of its Housing Rehabilitation program back in October 2024. In total, 488 households have been served by the rehabilitation and reconstruction program, with 394 from MID counties and 94 from NMID counties. All but 1 MID home belong to Low to Moderate Income (LMI) applicants. Additionally, 4 homes were moved from the 2018 Hurricane Florence Program to the 2016 Hurricane Matthew Program during Q2 2024. This transfer was authorized by the Additional Supplemental Appropriations for Disaster Relief Act, 2019, Pub. L. 116-20. The homes were located in the Most Impacted and Distressed (MID) counties shared by both grants.

The Buyout program is complete and no longer active. In total, 9 buyout properties have been acquired. All buildings and structures located on these properties have been demolished, with the land allowed to revert back to its natural state. A deed restriction will prevent the land from being commercially or residentially developed.

The State continues to take action to affirmatively further fair housing throughout its CDBG-DR and CDBG-MIT programs in accordance with the 1968 Fair Housing Act and HUD’s 2025 rule revisions.

Section 3 reporting under the new CFR 24 Part 75 rules is now conducted through the Quarterly Progress Report in the Disaster Recovery Grant Reporting system. The State is responsible for reporting all labor hours, Section 3 labor hours, and Targeted Section 3 hours in the QPR. Section 3 hours for its Single Family Housing program will be reported in their respective activities. During the life of the grant, no Homes triggered Section 3 reporting. Additional Section 3 documentation is attached to each respective activity that had the potential to trigger Section 3 reporting.

Additionally, Horne, LLP, the procured Implementation Contractor for this grant, merged with BDO Government Services, LLC in Q4 2025. Zero operational impacts or changes have occurred. BDO is still continuing to assist the State with grant support and closeout for the 2018 Hurricane Florence CDBG-DR Grant. This change is included within the contract report required by Public Law 115-254 and Public Law 116-20, which is attached to the Administration Activity.

B-19-DV-45-0002	\$0.02	\$972,000.00

Activity Description:

This activity will cover the general administration of the program by the South Carolina Office of Resilience's Disaster Recovery Office.

Location Description:

The Hurricane Florence CDBG-DR grant will serve Chesterfield, Darlington, Dillon, Florence, Georgetown, Horry, Marion, and Marlboro Counties. Additionally, Dillon, Horry, and Marion Counties are categorized as Most Impacted and Distressed (MID), with the rest of the counties being categorized as Non-Most Impacted and Distressed (NMID).

Activity Progress Narrative:

The State has completely drawn all grant funds and will submit the Closeout Documentation to HUD by the end of July 2026.

B-19-DV-45-0002	\$0.00	\$35,696.36

Activity Description:

This activity covers the program planning and community participation efforts of the grant. Some of these planning costs, as authorized by 24 CFR 570.489(b) and 570.200 (h), were in preparation for the grant and predate the grant agreement. Some of these pre-award costs included the Unmet Needs Assessment by Disaster Metrics, LLC, which utilized a Social Vulnerability Index to help the State target those that are the most vulnerable and unable to self-recover. This activity will cover all current and future planning costs as well.

The State values citizen and stakeholder engagement. South Carolina has developed a Citizen Participation Plan in compliance with 24 CFR 91.115 and applicable HUD requirements to set forth the policies and procedures applicable to citizen participation. This plan is intended to maximize the opportunity for citizen involvement in the planning and development of the South Carolina CDBG-DR recovery program. The State has published a Language Assistance Plan (LAP) in order to provide all citizens with equal access to information about the program, including people with disabilities and people with Limited English Proficiency (LEP). It has published its Action Plan in both Spanish and English and encourages the participation of regional and state-wide institutions and organizations, such as Volunteer Organizations Active in Disasters (VOADs). The State also runs a monthly Stakeholder meeting that is open to the public. Since early 2020, the Stakeholder meeting has been held virtually through Zoom.

Location Description:

The Hurricane Florence CDBG-DR grant will serve Chesterfield, Darlington, Dillon, Florence, Georgetown, Horry, Marion, and Marlboro Counties. Additionally, Dillon, Horry, and Marion Counties are categorized as Most Impacted and Distressed (MID), with the rest of the counties being categorized as Non-Most Impacted and Distressed (NMID).

Activity Progress Narrative:

As mentioned in the 5th Action Plan Amendment, the State moved its Stakeholder Meetings to a quarterly basis. Because of the 2024 Hurricane Helene, Stakeholder meetings are now occurring on a monthly basis.

Additionally, it is committed to public transparency and will continue to post updated program information and statistics online.

Activity Description:

The State will run a Single Family Rehabilitation program to assist those within the Low to Moderate Income (LMI) community that have been unable to self-recover from damage as a result of Hurricane Florence. Depending on the damage, the State, through its contractors, will either rehabilitate the applicant's damaged Manufactured Housing Unit (MHU) or Stick Built Home, replace the MHU with a new one, or reconstruct a new Stick Built Home depending on the severity and cost of repair of the applicant's storm damaged home. In order to ensure that those most vulnerable receive assistance first, the State will serve applicants based on a 1-8 prioritization matrix, in accordance with the approved Action Plan. The categories are based on the applicant's

household income, whether any members of the household are age dependent (65 and older or 17 and younger), and whether anyone within the household is disabled.

Additionally, the State may, on an extremely limited case by case basis, provide temporary relocation assistance to some applicants that are unable to find anywhere to temporarily live while their home is under construction.

This specific activity will focus solely on the Low to Moderate Income Community within the Most Impacted and Distressed Counties.

Section 3
The State anticipates that the overwhelming majority of Section 3 projects will not trigger the \$200,000 reporting requirement. Only 1 home rehabilitation triggered Section 3 reporting requirements within a Most Impacted and Distressed County. Since it does not anticipate any additional rehabilitations triggering Section 3, the State has decided to only input the actual Section 3 hours previously recorded within the Section 3 labor hour projection fields.

Update: The South Carolina State Housing Finance and Development Authority (SHA) has given the South Carolina Office of Resilience (SCOR) \$7,320,000 from the South Carolina Housing Trust Fund to assist the Single Family Rehabilitation Program. All homes received \$15,000 from SHA that went towards their reconstruction and rehabilitation costs. In total, \$1,410,000 was spent in NMID counties and \$5,910,000 was spent in MID counties. While the funds had to be attributed to individual cases, they did not further increase the benefit amount of the selected cases or directly benefit the selected applicant. At no point in time did the selected applicants directly receive any of these funds. Instead, the SHA funding was used to free up HUD CDBG-DR dollars to assist additional applicants that otherwise would not have been served.

Location Description:

This activity will be solely focused on the Most Impacted and Distressed Counties of Dillon, Horry, and Marion.

Activity Progress Narrative:

On October 30th, 2024, the State completed its last home for the 2018 Hurricane Florence Single Family Home Rehabilitation program. In total, 394 homes have been completed in MID counties, with 393 belonging to LMI applicants. All 1 year warranties provided with each house were completed in 2025.

Additionally, this activity benefited from non CDBG DR expenditures from SHA funding. The funding was given on a per house basis, but did not go directly to the applicants. Rather, it was used to supplement the amount of HUD CDBG DR funding each home rehabilitation received and to allow the State to serve more applicants. The inclusion of the non-Federal funding meant that no homes utilized more than \$200,000 in HUD Funding and therefore did not trigger additional Section 3 reporting requirements.

This activity focused on assisting those in the first 6 priority categories, who are classified as Low to Moderate Income (LMI) applicants and live within the Most Impacted and Distressed (MID) counties.

Activity Description:

Note: Based on its prioritization matrix, allotted resources, and the number of LMI applicants, the State will not be serving any cases that qualify solely under the Urgent Need's objective. All funds from this activity have been transferred to its LMI counterpart.

Additional Note: During a case closeout review for an applicant served by the 2016 Hurricane Matthew CDBG-DR Grant, the State discovered that their documented income was above the Area Median Income limits listed within the Hurricane Matthew Action Plan. Given that the applicant had already been served, the Federal Register authorized the interchangeability of funds between the Hurricane Matthew and Hurricane Florence grants, and the applicant's eligibility to participate within the Hurricane Florence grant, the State has decided to transfer this case and its related costs over to the Hurricane Florence grant. Given the current projections for

Hurricane Florence, the State does not expect to serve any additional Urgent Need Applicants.

After the Single Family Rehabilitation program assists its Low to Moderate Income (LMI) applicants, the State will assist applicants who display Urgent Need whose Area Median Income (AMI) is between 80-120%. Depending on the damage, the State, through its contractors, will either rehabilitate the applicant's damaged Manufactured Housing Unit (MHU) or Stick Built Home, replace the MHU with a new one, or reconstruct a new Stick Built Home depending on the severity and cost of repair of the applicant's storm damaged home. In order to ensure that those most vulnerable receive assistance first, the State will serve applicants based on a 1-8 prioritization matrix, in accordance with the approved Action Plan. The categories are based on the applicant's household income, whether any members of the household are age dependent (65 and older or 17 and younger), and whether anyone within the household is disabled.

Additionally, the State may, on an extremely limited case by case basis, provide temporary relocation assistance to some applicants that are unable to find anywhere to temporarily live while their home is under construction.

This specific activity will focus solely on Non-LMI applicants that qualify as Urgent Need within the Most Impacted and Distressed Counties.

Location Description:

Activity Progress Narrative:

As mentioned in earlier QPRs, the State identified an already served home from the 2016 Hurricane Matthew program whose applicant made above the income limit for the storm. The error occurred during the program intake and eligibility phase due to the Implementation Contractor misreading the income document provided. Due to the interchangeability of funds between the 2016 Hurricane Matthew and 2018 Hurricane Florence grants, the home was able to be transferred over to the Hurricane Florence MID Urgent Need activity. Costs related to this case were originally placed within the MID LMI Housing activity, but were correctly transferred over to this activity through a voucher revision.

B-19-DV-45-0002	\$0.00	\$0.00

Activity Description:

Due to a lack of flood maps or topographic changes, a significant number of homes were developed in what is now identified as the flood plain. Additionally, Hurricane Florence's severe winds, rains, and related flooding damaged some homes to be beyond the homeowner's ability to self-recover. While some citizens are able to, at great cost, elevate their home or mitigate their flood and storm risk; many, including the LMI community, face difficulty in storm proofing their homes or recovering from flood and storm damage. Furthermore, the homeowner faces great difficulty in selling their property at its pre-disaster worth in order to move to an area with a reduced flood risk.

The buyout program, which has seen great success in other cities and states, seeks to achieve two main objectives. First, it seeks to alleviate homeowners that are unable to self-recover from damage from Hurricane Florence by buying out their property at fair market value. This will allow the bought-out homeowners to move to an area with a reduced flood risk. Additionally, LMI homeowners will be eligible for an LMI housing incentive to assist homeowners in relocating to a new residence. Non-LMI homeowners may be eligible for a moving expense incentive as well. The purpose of these incentives is to allow homeowners the ability to relocate to an area with a reduced risk of flooding while not being made worse off financially or in terms of housing quality by participating in the program. Second, once the houses are bought out, the State will demolish the homes and transform the land into open greenspace, recreation areas, or managed wetlands. This will assist the nearby community, as it increases the absorption of the nearby watershed and helps protect neighboring buildings. Once demolished, a covenant will be tied to the land that prevents any non-recreational future development. After completion, the land will be transferred to either local government, non-profit organizations, or other entities.

In order to qualify under the LMI National Objective, all Buyout Activities must provide an additional benefit to its LMI applicants beyond simply purchasing the property at market value. In order to achieve this, the State provided a \$25,000 LMI Incentive to all LMI Households that participated in the program. In total, \$225,000.00 in LMI Incentives were awarded to the LMI participants. Within this Activity in DRGR, the State has attached a breakdown of the LMI Incentives, Moving Incentives, and Market Adjustments that each case received.

This buyout activity solely focuses on the LMI community, specifically the acquisition and LMI housing incentive portions of the buyout program. A sister activity will cover the demolition portion of the buyout program.

Location Description:

The Buyout Activity will only be carried out in the MID counties of Dillon, Horry, and Marion.

Activity Progress Narrative:

With the completion of the Buyout program, 9 homes have been purchased from their original homeowners. All 9 homes have completed the demolition process and are undergoing closeout review. All 9 homes received the offered LMI Incentives, while only 8 received Market Adjustment Incentives for their property.

The Buyout program sought to remove flood-prone homes from the 100 year Floodplain that were damaged by Hurricane Florence. The program sought to give these homeowners the chance to move away from the flood zone, and the risk of future storm damage, by purchasing their house at pre-disaster fair market value.

This activity solely focused on the Acquisition portion of the Home Buyout program for Low to Moderate Income (LMI) applicants within the Most Impacted and Distressed (MID) counties. Eligible Applicants were served in order of their Priority status. A separate LMI Demolition activity was created to better track the progress, finances, and Section 3 applicability of the demolition portion of the program.

Additionally, participation within the Buyout program was 100 percent voluntary and applicants still had the option to participate in the Single-Family Residential Rehabilitation program if they opted out of the Buyout program.

Activity Description:

Due to a lack of flood maps or topographic changes, a significant number of homes were developed in what is now identified as the flood plain. Additionally, Hurricane Florence’s severe winds, rains, and related flooding damaged some homes to be beyond the homeowner’s ability to self-recover. While some citizens are able to, at great cost, elevate their home or mitigate their flood and storm risk; many, including the LMI community, face difficulty in storm proofing their homes or recovering from flood and storm damage. Furthermore, the homeowner faces great difficulty in selling their property at its pre-disaster worth in order to move to an area with a reduced flood risk.

The buyout program, which has seen great success in other cities and states, seeks to achieve two main objectives. First, it seeks to alleviate homeowners that are unable to self-recover from damage from Hurricane Florence by buying out their property at fair market value. This will allow the bought-out homeowners to move to an area with a reduced flood risk. Additionally, LMI homeowners will be eligible for an LMI housing incentive to assist homeowners in relocating to a new residence. Non-LMI homeowners may be eligible for a moving expense incentive as well. The purpose of these incentives is to allow homeowners the ability to relocate to an area with a reduced risk of flooding while not being made worse off financially or in terms of housing quality by participating in the program. Second, once the houses are bought out, the State will demolish the homes and transform the land into open greenspace, recreation areas, or managed wetlands. This will assist the nearby community, as it increases the absorption of the nearby watershed and helps protect neighboring buildings. Once demolished, a covenant will be tied to the land that prevents any non-recreational future development. After completion, the land will be transferred to either local government, non-profit organizations, or other entities.

This activity solely focuses on the LMI community and will cover the demolition portion of the Buyout program. The LMI status of the original applicant's property during the Buyout acquisition phase is carried forward to this activity. The LMI Buyout Acquisition activity addresses how the program meets the LMI National Objective for Buyout activities.

Section 3:
The State does not foresee any demolition projects within this activity triggering Section 3 reporting requirements. Even though the activity budget exceeds \$200,000, the projects- as defined by Section 3- located under this activity are not expected to exceed the \$200,000 amount that triggers Section 3 compliance. Section 3 defines a project as “[...] the site or sites together with any building(s) and improvements located on the site(s) that are under common ownership, management, and financing.” Since the State never takes possession of the property, only the original owner or the new owner can fall under the common ownership definition. Since the Buyout activity is spread across three counties and is limited in scope, none of the new owners have enough combined demolition costs to trigger Section 3 reporting. The Section 3 hour projections are an estimate of the total number of hours assuming that the the activity triggered Section 3 reporting, which it does not.

Location Description:

The Buyout Activity will only be carried out in the MID counties of Dillon, Horry, and Marion.

Activity Progress Narrative:

In total, 9 properties have been demolished and cleared to their natural state during the Buyout Program.

Additionally, the State did not trigger Section 3 for any of its projects within the Buyout Program. This activity geographically encompassed several counties, with towns, counties, and other entities becoming the new owners of the cleared land. While the total activity budget may exceed \$200,000, the combined demolition costs under each new owner did not exceed the reporting trigger amount, as defined by 24 CFR 75.3 a 2 i. None of the combined totals for each new individual owner exceeded the \$200,000 threshold in HUD assistance. A sheet detailing the exact amounts and the new ownership is attached to this activity.

Activity Description:

Closed: No Urgent Need applicants were served under the 2018 Hurricane Florence Buyout program as of grant closeout. Due to this, the activity within DRGR has been canceled.

Update 1: As part of Amendment 4 to the Action Plan, this activity's budget will completely be transferred over to the Housing program. The State anticipates its Buyout program will entirely be composed of Low to Moderate Income households. Nonetheless, this activity will retain its "Under Way" status until the State has fully finished the Buyout program.

Due to a lack of flood maps or topographic changes, a significant number of homes were developed in what is now identified as the flood plain. Additionally, Hurricane Florence's severe winds, rains, and related flooding damaged some homes to be beyond the homeowner's ability to self-recover. While some citizens are able to, at great cost, elevate their home or mitigate their flood and storm risk; many, including the LMI community, face difficulty in storm proofing their homes or recovering from flood and storm damage. Furthermore, the homeowner faces great difficulty in selling their property at its pre-disaster worth in order to move to an area with a reduced flood risk.

The buyout program, which has seen great success in other cities and states, seeks to achieve two main objectives. First, it seeks to alleviate homeowners that are unable to self-recover from damage from Hurricane Florence by buying out their property at fair market value. This will allow the bought-out homeowners to move to an area with a reduced flood risk. Additionally, LMI homeowners will be eligible for an LMI housing incentive to assist homeowners in relocating to a new residence. Non-LMI homeowners may be eligible for a moving expense incentive as well. The purpose of these incentives is to allow homeowners the ability to relocate to an area with a reduced risk of flooding while not being made worse off financially or in terms of housing quality by participating in the program. Second, once the houses are bought out, the State will demolish the homes and transform the land into open greenspace, recreation areas, or managed wetlands. This will assist the nearby community, as it increases the absorption of the nearby watershed and helps protect neighboring buildings. Once demolished, a covenant will be tied to the land that prevents any non-recreational future development. After completion, the land will be transferred to either local government, non-profit organizations, or other entities.

This Buyout activity solely focuses on Non-LMI applicants displaying Urgent Need that qualify for the program.

Activity Description:

December 2024 Update: Due to not receiving any eligible rental rehabilitation applications that fit within HUD and SCOR requirements, the Affordable Rental Program was officially canceled in the 6th Amendment to the Action Plan. The budget for the Affordable Rental Program was transferred to the Single Family Housing Rehabilitation Program. Funds drawn from this program were moved to the Administration Activity since they did not go towards an achievement that met a National Objective.

The South Carolina Office of Resilience's Disaster Recovery Office's (SCDRO) Affordable Rental Program seeks to repair and restore the availability of affordable rental stock in the areas strongly impacted by Hurricane

Florence. The program will provide up to \$50,000 in construction services to rental property owners for eligible activities including the rehabilitation and associated improvements, such as energy efficiency and resilience activities, of vacant single-family stick-built rental properties. Once construction is finished, the property owner will be required to lease the unit only to Low to Moderate Income (LMI) households that earn 80% or less of the Area Median Income. The rehabilitated rental property will also be required to adhere to the HUD HOME rent limits for 5 years.

Location Description:

This activity will focus solely on the Most Impacted and Distressed Counties of Dillon, Horry, and Marion.
